Remote Control your terminal interface for troubleshooting easily

App Management

Version Management

Manage different APP version

Silent Installation

User can install and uninstall application silently

Blacklist/Whitelist

Device will prohibit any installation of the APP in the blacklist.

Customized App Store

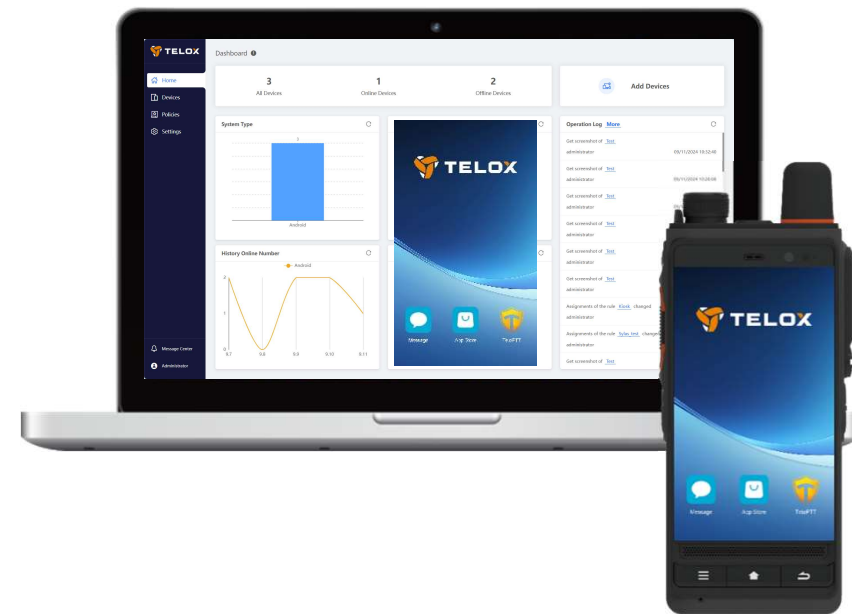

Upload and manage private App store

Kiosk Management-Single/Multiple App Mode

Lock the device operations to a single/multiple app.

When enabling Single/Multiple App Mode, the device's operation will be locked to a specific app.

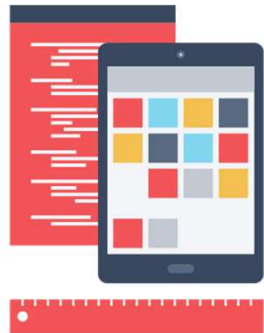

Single/Multiple App Mode is designed to help restrict device usage and increase productivity, which is perfect for businesses that want to ensure that their employees stay focused on work-related tasks and prevent distractions.

- ✓ Prevent users from accessing hardware keys
- ✓ Block Phone Settings
- ✓ Transform the device into a business-only device
